

SIX SENSES FIJI

Six Senses Fiji offers 26 spacious pool *bures* all with private plunge pools ranging in size from 110 to 150 square meters.

The property includes a superb range of culinary and beverage offerings, including two restaurants plus an outdoor pizzeria and grill, three bar options, a gourmet food market and a walk-in wine cellar and tasting table, all set amongst the tropical landscape. Locally inspired and sustainably sourced, the resort's cuisine features ingredients grown onsite in the resort market gardens and from local farmers, markets and fishermen.

Sustainability lives at the foundation of the Six Senses Fiji and is reflected throughout the resort through active management of energy, water, waste, biodiversity, purchasing and chemical usage. The resort is 100 percent solar powered and the first micro-grid in the world to use Tesla batteries. The project includes tree reforestation on site

to offset wood used in construction and also coral reforestation to promote sea life and enhance the local marine environment.

Waterfall Associates Ltd. is the Architect of record for the project, working closely with the concept designer, interior designer to deliver this large and complex high quality offering.
